SOFTWARE ENGINEERING SUMMARY

Software engineer with experience using JavaScript, React, and Typescript. In my current role, I am working with a Google Cloud Infrastructure with Vue.js, Vuex, and Vite.

EMPLOYMENT & EXPERIENCE

Calaxy
Remote
Software Engineer
August 2021 - present

- Created the Session History Vue component for Calaxy's internal admin tool
- Built a Pagination Cursor Vue component to paginate users from a Rust API built by an external contractor with Calaxy
- Took Figma designs to create a social token leaderboard for Calaxy token holders, assisted by a junior developer on our team
- Coordinated with the junior developer to work out the layout bugs in the social token leaderboard
- Collaborated with a junior developer on improving the speed of our API calls for the social token leaderboard
- Refactored all of the HTML & CSS in the social token leaderboard

Bumped
Remote
Freelance Frontend Engineer
March 2020

- Refactored Bumped's Gatsby site using styled-components, JavaScript, and TypeScript
- Used React, JavaScript, and styled-components, a CSS framework, to build out the landing page
- Used custom React components and private npm modules for a custom design language used throughout the site
- I refactored the site using the React static site generator Gatsby.js with our data queried by GraphQL and JavaScript

ICF
Remote
Frontend Developer
July 2019 – Feb 2020

- Responsible for rebuilding the entire UI for one government website using React, Reactstrap, and Typescript
- Built the login page and citation pages with the United States Government web design language, custom HTML for the footer and header
- Responsible for maintaining government websites with HTML 5, SASS, JavaScript, and jQuery to add interactivity
- Attended weekly check-ins and daily standups to discuss the progression of our work for clients using Jira and Confluence
- Used Jenkins as continuous integration and testing before deploying to production
